PROFILE

UI/UX Designer and creative technologist focused on building intuitive, user-centered digital experiences. Combining UX research, product thinking, visual design and frontend development to transform complex problems into accessible, engaging and AI-powered solutions.

EXPERIENCE

Editorial & Social Media Lead
Animation Club, VITC | Apr 2026 – Present
• Leading content initiatives, coordinating teams and editing visual content for consistency
• Strengthening leadership, communication and team management skills through coordinating workflows

Summer Intern - UI/UX & Digital Marketing
IIT Jammu | June 2026 – August 2026
• Translated user requirements into high fidelity interfaces using user-centered design principles and methodologies
• Gained industry insights and practical knowledge from mentors working at leading tech companies

Campus Ambassador
E-Cell, MANIT Bhopal | Jan 2026 – Feb 2026
• Promoted initiatives through digital platforms and peer networks
• Strengthened communication and outreach skills

PROJECTS

Uber App Redesign – Women Safety & Fair Payment Flow | Real-world problem + UX thinking
• Introduced an alert system for continuous route deviation to notify users and trigger safety actions.
• Proposed a driver proof-of-payment feature to ensure transparent and verified fare transactions.
• Published a detailed UX case study blog on Medium documenting the problem, process and solution.

PAWCARE - Where petcare meets community (Frontend Dev · React · Firebase)
• Designed a responsive pet care platform with modern UI/UX, glassmorphism styling and intuitive user flows.
• Built dynamic React features including adoption, booking, lost & found, community map and profile dashboards.
• Integrated Firebase Authentication for real-time user data and cloud-based functionality.

OBSTACLE DETECTION CAR (Robotics · Microcontroller)
• Built a microcontroller-based robotic car for real-time obstacle detection.
• Integrated sensors with motor control for autonomous navigation.

SMART CLASSROOM SEAT (Robotics · Arduino UNO · Sensors)
• Developed an Arduino UNO-based smart seating prototype using sensor-driven automation.
• Integrated hardware components for responsive classroom interaction.

SMARTMAIL AI (UI/UX · React · Python · FastAPI · SQLite · NLP)
• Built AI-powered email categorization, summaries, deadline detection and reply assistance.
• Designed user-centered interfaces through research, wireframing and prototyping.

EDUCATION

Vellore Institute of Technology | 2025-2028
Btech in CSE Artificial Intelligence and Robotics

Delhi Public School, Joka, South Kolkata | 2015-2024

SKILLS

Design:
UX Research, Interaction Design, User Flows, Journey Mapping, Wireframing, Prototyping, UI Design, Design Systems, Usability Testing, A/B Testing, Micro-interactions

Tools:
Figma, FigJam, Adobe Creative Suite, Canva, HTML, CSS, JavaScript, React, Python, AI/ML, NLP, ROS, FastAPI, Firebase, SQLite, Arduino, TinkerCAD
